FOR IMMEDIATE RELEASE

BETSY MCGEE, PRESIDENT OF ADI METAL IS RECOGNIZED AS ONE OF FLORIDA'S 50 TOP WOMEN-LED BUSINESS LEADERS FOR 2014

The Commonwealth Institute South Florida (TCI) is pleased to announce Betsy McGee, President of ADI Metal has been selected as one of the Top 50 Women-Led Business Leaders in Florida for the second consecutive year.

The list was derived as a result of Betsy's participation in a recent study sponsored by CBRE and conducted by TCI and Moore Research that looked at the characteristics of woman leaders and the businesses they lead.

The survey, in addition to determining the top women-led businesses, found that there is a trend of increased confidence; almost 78% of respondents look for modest or substantial growth in their organizations, up from 70% in 2013 and 67% in 2012

Betsy was presented with her award at The Ninth Annual Women-Led Businesses in Florida Luncheon & Awards Ceremony at the Hilton Hotel Downtown Miami. This recognition of Betsy and ADI Metal's commitment to always looking to improve business performance is timely as Betsy and ADI Metal continue to focus on their customers needs and the environment her valued team works in by introducing new technologies and services along with the addition of new product lines and processing capabilities.
